

Contemporary Living with Multiple Spaces

Kingston 281 delivers a considered approach to modern family living, centred around a generous open-plan living hub.

At the front of the home, the master suite offers a private retreat with walk-in robe and ensuite, while the rear wing accommodates three additional bedrooms and a rumpus room, creating clearly defined family zones.

The central kitchen, dining, and living area connects these spaces seamlessly, supporting both shared living and private retreat options. A double garage and mud room enhance functionality and everyday ease.
